# Maximizing Your Captivate© Content With uPerform®

Captivate eLearning content is useful to end users but only if the content is easy to access. uPerform by ANCILE Solutions® provides your organization with a full learning content management and distribution system, with content creation tools optimized for speed of development and delivery to learners. With uPerform, you can upload Captivate, and other external or third-party performance support content, making it available to your entire organization in a single repository, so learners have a single place to go for all of your training and support content.

| Create Content | |
| --- | --- |
| uPerform | • Simulations<br>• eLearning Courses<br>• Procedural Docs<br>• Videos |
| Captivate | • Simulations<br>• eLearning Courses<br>• Project Files (.cptx) |
| 3rd Party Content | • PPT, Word, PDFx etc.<br>• Videos/Photos<br>• Web Links |

| uPerform | |
| --- | --- |
| **Manage Content** | **Distribute Content** |
| • Project Management<br>• Versioning<br>• Translate Content | • uPerform Learning Library<br>• Customizable Content<br>• In-Application Help for Performance Support<br>• LMS Integration and Reporting |
| **Tracking & Analytics** | |

**Benefits of uPerform:** uPerform reinforces learning in the workflow, accelerates content creation, and simplifies content management. It acts as a Learning Content Management System (LCMS) allowing administrators to manage and distribute existing Captivate content. End the struggle with multiple content repositories by centralizing and managing all of your learning content in the uPerform document library.

| uPerform | Description |
| --- | --- |
| Project Management | An administrator can track the versioning of Captivate content. |
| In-Application Help | Captivate content can be delivered through uPerform's in-application help functionality, enhancing performance support in the workflow, helping build end-user proficiency. |
| Learning Library | The Learning Library website acts as a central location where employees go to view Captivate content that is delivered based on their role and responsibility within an organization. |
| LMS Integration and Reporting | Published Captivate and uPerform content scores can be automatically streamed to an LMS via AICC, reducing maintenance time and costs. As the content is updated and republished, users get the latest version. |
| Reporting and Usage Data | Administrators can track exactly how and when Captivate content is being consumed by end users with both canned and custom reports. |

**uPerform Reporting Dashboard:**
The customizable uPerform dashboard provides analytics so that you can track the ROI on your technology investment.

Get insight into what content users are consuming and from which apps.

Change management notifications alert you when apps and content change.

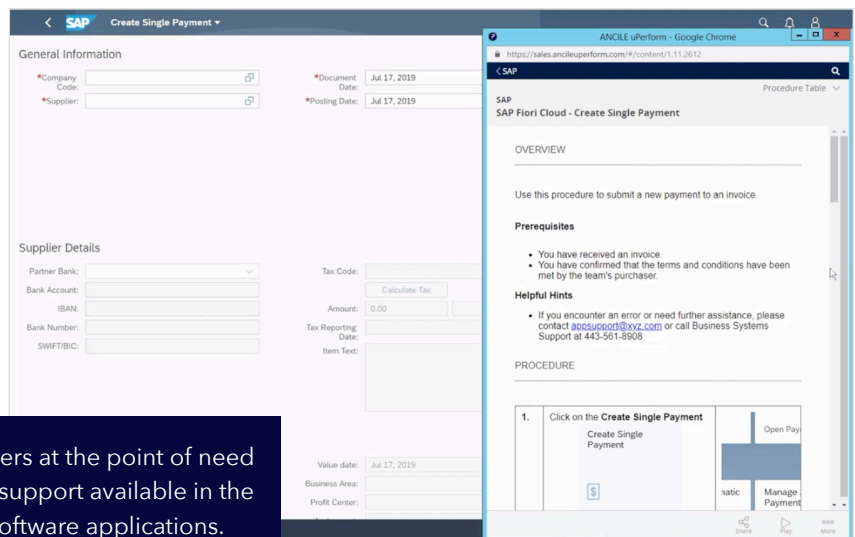

Provide visibility to learning project status and content usage to inform investments and verify organization readiness.

Run standard reports or create custom reports by determining which categories and filters to apply.

**Provide In-Application Help with Captivate & uPerform Content:**
Existing content can be delivered with uPerform to end users when they need help the most.

Assist team members at the point of need with performance support available in the workflow of your software applications.
